

MCH2022 Location Regulations

Regarding the use of motorized vehicles*

General

- Maximum speed is 15km/h
- Maximum speed near people is 5 km/h (walking speed)
- Vehicles may not carry more people than it is designed for (so no people hanging off the vehicle or riding along in the trailer; we have ample bikes available!).
- Vehicles may not be operated by people not licensed or officially trained to do so.
- Reflective clothing has to be worn at all time
- In case of malfunction or problems; shutdown the vehicle, mark it as out of use and notify management immediately. DO NOT try to fix things yourself!

Forklift (including telehandlers with forks)

- The seatbelt has to be worn at any time
- No lifting of people in any circumstances!
- Approved safety shoes have to be worn
- Driving with an elevated load is prohibited
- Within a crowded area the use of a spotter is required. Spotter should wear safety shoes and a helmet.
- Take care of the field. Do not turn the wheels on the spot.

Boom lift (including rotating telehandler with platform)

- Harness has to be worn before entering the platform and directly connected
- A helmet has to be worn when near the boom lift or on the platform
- No driving when extended. Only drive with the boom down, and the jib lifted.
- Assign ground support that knows how to get you down in case of trouble. Make sure you have a way of communication (portable radio).
- Use sufficient jack or dirt plates and use stabilizers when available

Crane (Rotating telehandler with winch)

- Direct surroundings should be cleared and sufficient spotters used.
- Spotters and operator should wear safety shoes and a helmet.
- Use stabilizers with sufficient jack plates

Version 0.9; Manduca

*) These include, but are not limited to, site carriers, forklift trucks, telehandlers and boomlifts
